

**StorageCraft Appoints ACA Pacific as Distributor in South East Asia
Real-Time Recovery Solutions drives StorageCraft business worldwide**

Singapore, April 12 2007— StorageCraft Technology Corporation, a provider of innovative disk-based backup, disaster recovery, data protection, migration and security solutions for servers, desktops and laptops, today announced the company's expansion in the Asia Pacific region, appointing ACA Pacific as the distribution partner for Singapore and Malaysia.

Richard Giddey, Regional Sales Manager for StorageCraft Asia Pacific stated, "StorageCraft has experienced world wide exponential growth of our Real-Time Recovery technology, ShadowProtect™, as it enables organisations to rebuild a server in minutes instead of hours." He continued, "We have seen rapid adoption of our solutions throughout Australia and New Zealand and expect similar success as we expand into Southeast Asia."

"Our partnership with ACA Pacific is the natural choice as they are the leading storage distributor in Southeast Asia. ShadowProtect will complement their storage portfolio and will add exceptional value for small and mid-sized businesses that are looking to invest in a total backup and disaster recovery solution," said Giddey.

StorageCraft ShadowProtect disk-based backup and disaster recovery delivers Real-Time Recovery that enables organisations of all sizes to reduce the cost and complexity of protecting and recovering systems, data and databases in a Windows environment.

Greg Wyman, Regional Manager for StorageCraft, Asia Pacific stated "Companies are migrating to Real-Time Recovery as it provides the ability to rebuild a Windows server in typically less than 12 minutes after a system crash, corruption or virus attack. In addition, data recovery is fast, simple and most importantly reliable, ensuring organisations do not lose more than 15 minutes of Exchange e-mails, SQL transactions or data."

Mark Gill, Managing Director of ACA Pacific Singapore, added, ""Research firm IDC indicated that more than 50 percent of small and medium businesses cited improved data availability and recovery as their No. 1 storage management challenge. Using ShadowProtect™ Real-Time Recovery solutions both are achieved and will enable our resellers to deliver complete business continuity, recovery and protection solutions at an affordable price point to their customers."

Pricing and Availability

ShadowProtect Server Edition™ is available for USD\$699 (excl. GST) per sever.
ShadowProtect Desktop Edition™ is available for USD\$69.95 (excl. GST) per desktop.

About Real-Time Recovery and ShadowProtect

StorageCraft™ leads the Real-Time Recovery market with millions of installations worldwide of its Volume Snapshot Manager technology. StorageCraft ShadowProtect reduces the cost and complexity of traditional backup and recovery by delivering next generation complete system, data and database protection and recovery in a single intuitive and affordable solution. For a product to deliver Real-Time Recovery, it must be able to perform bare-metal restore (BMR) of a server in minutes, protect data every 15 minutes, use 'Set & Forget' scheduling, 'Drag & Drop' for restores and be based on Microsoft WinPE.
